SUMMARY

Full Stack Developer with 4+ years of commercial experience building scalable web applications using React, Next.js, TypeScript, and Node.js across FinTech, E-commerce, Gambling, and EdTech domains.

Confident user of AI-assisted development tools (Cursor, ChatGPT, Claude, Codex), actively integrating them into daily workflows for coding, refactoring, debugging, testing, and documentation to improve productivity and development speed.

Focused on building performant, maintainable, and scalable applications with strong attention to code quality, architecture, and user experience.

EDUCATION

National aviation university Kyiv | 2020 - 2024

Bachelor of Software engineering

Learned computer science and programming principles. Studied Object-Oriented Programming (OOP) and software development using C++, C#, Java, PHP, and Python, along with fundamental university-level topics such as data structures, algorithms, databases, operating systems, and software engineering basics.

EXPERIENCE

MB Digital (EdTech) | 2025.09 - today

Mid Frontend & Full-Stack developer

- Implemented client-side caching and offline synchronization, reducing repeated API requests by 60%+ and improving application responsiveness.
- Optimized asset caching and data loading strategies, reducing page load times by up to 40%.
- Achieved 80-98% unit test coverage across core application features.
- Developed end-to-end tests (E2E) using Cypress/Playwright to validate critical user flows and production scenarios.

Citrus (E-commerce) | 2025.01 - 2025.09

Mid Frontend developer

- Maintained and developed a high-load web application with 800,000+ monthly active users, focusing on performance, reliability, and scalable frontend architecture.
- Optimized frontend bundle size by removing unused dependencies and improving tree-shaking, reducing total bundle size by ~20-40%.
- Improved Core Web Vitals (LCP / FCP) by reducing initial asset load and optimizing critical rendering path.

Kvazi Team (Gambling) | 2022.09 - 2024.12

Frontend developer

- Developed a PWA casino application integrated with Telegram Mini Apps.
- Implemented offline-first features with local data storage and backend synchronization, reducing data loss incidents by ~80-90% in unstable network conditions.
- Replaced 5-second polling with WebSocket-based real-time updates, reducing API requests by approximately 60-75%.

SKILLS

- | | | |
|---------------------------------|--------------------------------|----------------------------------|
| • React React Native | • Unit Jest Vitest | • ECMAScript ES6+ |
| • Next | • Cypress Playwright | • Git, GitLab, CI/CD |
| • TypeScript JavaScript | • Rest GraphQL | • Docker |
| • Node Nest Express | • Prisma SQL noSQL | • Agile Scrum |
| • HTML5 CSS3 SCSS | • Webpack Vite Babel | • Monorepo pnpm Turborepo |
| • Tailwind SASS | • Storybook | • Cursor, ChatGPT, Claude, Codex |
| • Redux / Mobx / Zustand | • tRPC API integration | • WebSockets |
| • RTK Query / Tanstack Query | • UI/UX Figma | • PWA Distributed teams |
| • Performance Core Web Vitals | • Security Scalability SEO | • ZOD YUP |
